

LEVEL 1 — COMPLETE GAMEPLAY REFERENCE

Eight separate gameplay sections for Claudia to use as the visual/gameplay guide.

Important: Build these as one continuous Level 1 progression, not as isolated screens. Keep the character naturally aligned with the direction of the platform path and preserve the mobile-game perspective and visual style.

01 — Jump on the Matching Colors in Order

The player follows the displayed color sequence and jumps across the matching colored platforms in order.

Claudia: use this as the reference for this Level 1 section. Keep the same fantasy world, character orientation, camera direction, platform perspective, HUD treatment, and overall mobile-game presentation.

02 — Platforms Rotate! Time Your Jumps!

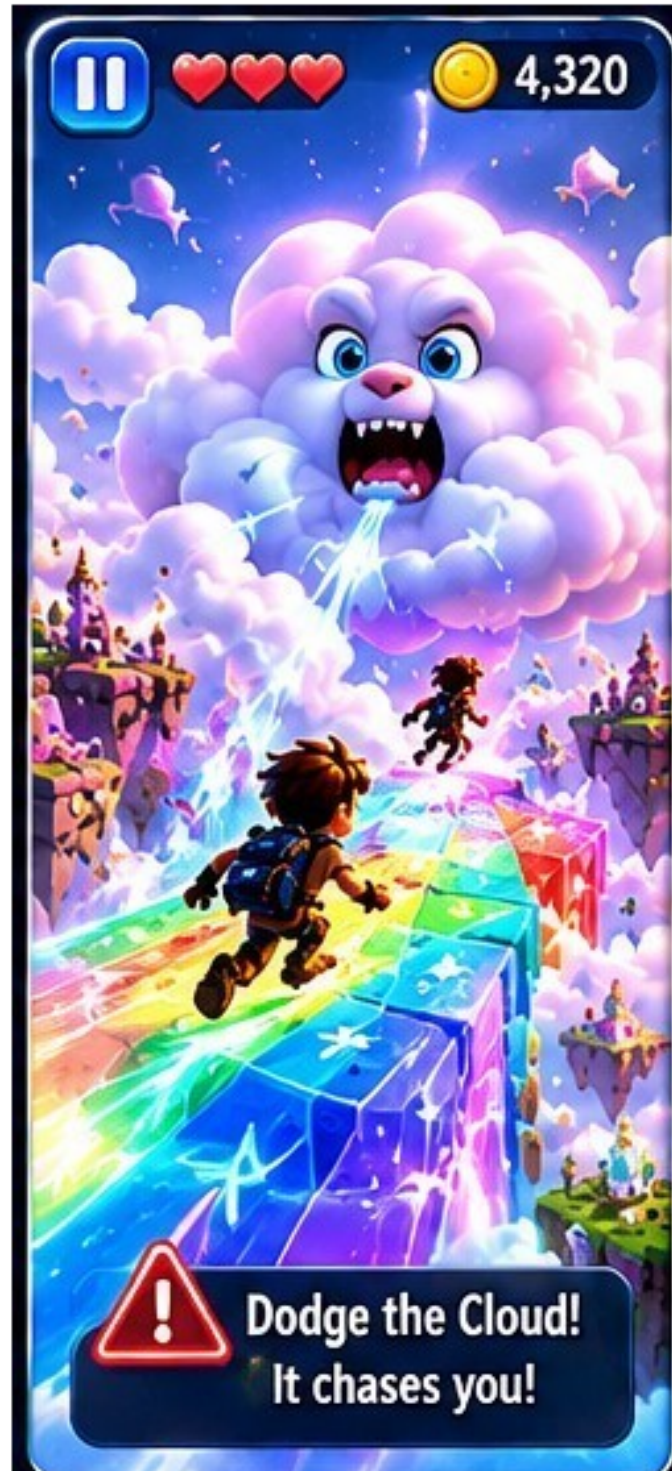

A rotating-platform section where the player must time jumps while platforms move and rotate.

Claudia: use this as the reference for this Level 1 section. Keep the same fantasy world, character orientation, camera direction, platform perspective, HUD treatment, and overall mobile-game presentation.

03 — Dodge the Cloud! It Chases You!

A chase/hazard section where the cloud actively follows the player and must be avoided.

Claudia: use this as the reference for this Level 1 section. Keep the same fantasy world, character orientation, camera direction, platform perspective, HUD treatment, and overall mobile-game presentation.

04 — Watch for Fake Platforms! They Disappear!

A disappearing-platform section where fake platforms vanish and the player must react quickly.

Claudia: use this as the reference for this Level 1 section. Keep the same fantasy world, character orientation, camera direction, platform perspective, HUD treatment, and overall mobile-game presentation.

05 — Take the Secret Rainbow Route!

A secret alternate rainbow route that the player can discover and travel through.

Claudia: use this as the reference for this Level 1 section. Keep the same fantasy world, character orientation, camera direction, platform perspective, HUD treatment, and overall mobile-game presentation.

06 — Moving Platforms! Jump, Slide and Flip!

A moving-platform obstacle section designed around jumping, sliding and flipping through the course.

Claudia: use this as the reference for this Level 1 section. Keep the same fantasy world, character orientation, camera direction, platform perspective, HUD treatment, and overall mobile-game presentation.

07 — Choose Your Path! Safer Route or Bigger Rewards!

A real route choice: a safer path versus a riskier path with greater rewards.

Claudia: use this as the reference for this Level 1 section. Keep the same fantasy world, character orientation, camera direction, platform perspective, HUD treatment, and overall mobile-game presentation.

08 — Reach the Rainbow Gate! Complete the Level!

The final section leads the player to the Rainbow Gate and then to the Level Complete/reward screen.

Claudia: use this as the reference for this Level 1 section. Keep the same fantasy world, character orientation, camera direction, platform perspective, HUD treatment, and overall mobile-game presentation.

FINAL BUILD REQUIREMENTS

- Build all eight sections as one continuous, playable Level 1 from start to finish.
- The boy must face the direction of travel. His head, shoulders, torso, hips, legs, and feet should naturally align with the platform path.
- Do not use a twisted, sideways, floating, or incorrectly rotated running/jumping pose.
- Include the complete floating-island world, rainbow waterfalls, castles, clouds, crystals, coins/rings, colorful platforms, hazards, alternate routes, and Rainbow Gate.
- Use the uploaded Rainbow Cascades reference as the visual source of truth rather than simplifying or redesigning the world.
- Finish the route at the Rainbow Gate and then show the Level Complete/reward screen.
